

Using Photoshop

Special Effects - FX

There are many effects, that can be used to enhance your design. There are also effects to help make your objects look three-dimensional. Right click on the layer you want to put effects on and trial the variety of special effects or features available to you.

FX

By using FX you can create a variety of special effect to make your objects look three dimensional. They can create more interest and emphasis on particular areas of your design work. You will find the FX button on the bottom of the 'Layer' window. Choose the 'Blending Option' you would like and the 'Layer Style' window will open. Adjust your Layer Style to suite your design.

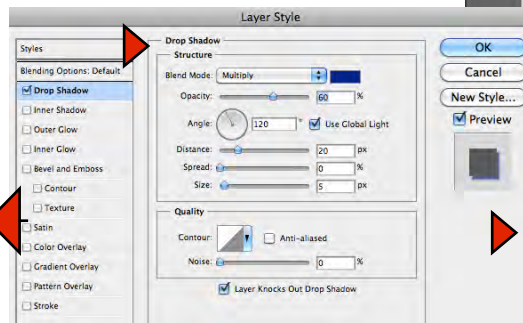

1. Original Type

Here in image 1 & 2, you can see the drop shadow option has been added to the type to make it stand out and attract attention

2. Type with Drop Shadow

Type with Outer Glow

Type with Inner Bevel

Type with Pillow Emboss

Type with Pattern Overlay & Drop Shadow

Type with Outer Stroke & Drop Shadow
